**REMARKS**

This communication is in response to the Office Action mailed on October 18, 2010. That Office Action states that the amendment to the specification filed on February 29, 2008 is improper. Applicant has corrected the amendment as suggested by the examiner, and resubmits the amendment to the specification herewith.

The reissue oath/declaration currently stands as defective for failing to identify at least one error. A supplemental declaration is being filed herewith, specifically identifying the following errors:

In particular, it was error to omit the language limiting the phase adjustment means of claim 1 to a differential phase adjustment means, and to omit the language requiring the differential phase adjustment means to be electrically connected on a path of transmission line means. It was also error to omit the language that limited the differential phase adjustment means to a coupling means that is arcuately moveable along an arcuate section of the transmission line means to cause said simultaneous advance of a phase angle of a signal to one of said first and third antenna groups and a delay of the phase angle of said signal to the other of said first and third antenna groups.

Applicant respectfully submits that the identification of errors as set forth above satisfies the requirements pursuant to 35 U.S.C. §251 and 37 CFR §1.175. No attempt to identify all of the errors in the declaration is attempted, nor is such identification required under the statute or rules.

Additionally, it is stated that a new oath is required to correct certain informalities. A new oath is submitted herewith correcting the informalities.
